

After months of vendor manufacturing supply shortages, TriCore is pleased to again offer the Vaginal Pathogen Panel by PCR (VAGPCR).

Effective March 15, 2021, TriCore clients should:

- Order VAGPCR, Vaginal Pathogen Panel by PCR.  
This test detects and identifies: Bacterial Vaginosis, Candida sp, and Trichomonas vaginalis.
- Collection Container: BD Max UVE collection kit
- Temperature Stability: ambient = 8 days | refrigerated = 14 | frozen = unacceptable
