

TEMPORARY CHANGE

STREPTOCOCCUS, GROUP A, BY DNA PROBE (GADNA)

Because of a vendor supply shortage, TriCore will use a temporary alternate method for Group A Strep detection.

Effective August 4, 2020, TriCore is reordering Streptococcus, Group A, by DNA Probe (GADNA) as Streptococcus Culture, Special (CSTRSP). This alternate method is temporary and we request that you order **CSTRSP** until further notice.

There is no change in collection containers. Using the same collection device is preferred.

Results turnaround time:

preliminary results	24 hours
final results	3 days

Thank you, we appreciate your understanding.
